FABPRO
FEATURES

Cloud-Based
Access FabPro1 anywhere, from any device with Internet connection

User-Based
Individual logins will save user settings as well as retain productivity tracking metrics. Add or delete users in user settings any time

Shift Login
Shifts provide accurate data for daily time-sheet and productivity tracking

Digital Drawings
Zoom in/Zoom out & easily confirm that the drawing version that is on the shop floor is the correct version

PDF Mark-Up
Keep and share all markups documented with the most up-to-date drawing versions

Design Integration
Simple two-way integration with Autodesk Fabrication CADmep and Revit allows for pushing data such as Drawing Status, PDFs, 3D Models, Cut Lists, BOMs, Joints and more

Custom Variables
Customized data will allow for accurate reporting & a custom system tailored to your company

Drawing Approval
Tracks drawing accuracy, material procurement status, and fabrication readiness

Simple Shop Functions
Simple shop functionality includes easy to use buttons like Start, Pause, and Complete

Table Views
Sortable, filterable tables allow for unique data flexibility and customization

TigerStop Ingetration
Connect FabPro and TigerStop using our iOS app - FabProTiger. Control the Tigerstop while collecting productivity data.

Priorities
Package and Spools can be assigned a priority level to instantly distinguish items on hold from rush order items

Custom User Permissions
Control what can be done or seen in the system by Tier level or down to a specific user

FABPRO
FEATURES

Archive
Keep older project data while keeping your tables clean with active work

QAQC
Digitally accept or reject and track quality issues in real time

Automatic Documentation
Automatically generate multiple documents such as: Welder continuity log, BOL, Weld Tracking, and Labels

Support
Tutorials, chat, phone, and email support with FabPro1 support team

Issue Reporting
Submit issue tickets to be able to easily create a record of who and when issues were reported and resolved
